

METALX

REFRACTORY ANCHORS CATALOGUE

Refractory Anchors, Fibre & Hex Mesh

METALX have been designing and manufacturing refractory anchors for over 25 years and offer an extensive range of high quality standard and custom made refractory anchor products for a variety of linings and lining depths.

Our experience has led to the development of a unique range of clever anchoring systems that offer our clients a flexible, reliable and cost effective solution to secure refractory linings.

We offer full in-house design and manufacturing for fast turnarounds on custom anchor designs. Additionally we hold a comprehensive range of common anchor shapes and sizes in stock.

Anchor Types include:

- Y & V Anchors
- Welded & Twisted Anchors
- Split Tyne, Stud Welded and Rotalock Anchors
- Christmas Tree and Strap Anchors
- Ceramic Anchor Brick Clips
- Shelf & PV Anchors
- Shelf Brackets & Fabricated parts
- Ceramic Fibre Fixings

Material Selection

Alloys behave differently in different environments and temperatures. Therefore the choice of material is critical for the refractory anchor.

METALX supply anchors in a variety of material options including standard heatresisting alloys such as SS304, SS310 & Inconel 601, 600, Inconel 800 supply.

For special requests please contact us for a custom quotation and lead time.
